

With great enthusiasm, the **Mexican Association of Pipelines and Hydrocarbon Transportation** and the **Government of the State of Tabasco**, we warmly welcome you to the **International Congress of Pipelines and Hydrocarbon Transportation, 2024 edition** to be held on **May 29, 30 and 31 of 2024**, at the Tabasco Convention Center.

We are pleased to announce the call for technical sessions that will be the fundamental pillar of this outstanding event in the hydrocarbon industry. At this conference, we will bring together renowned experts, innovators and professionals from around the world to explore the latest trends, technologies and challenges related to the transportation of hydrocarbons through pipelines. The technical sessions will provide an exceptional platform to share knowledge, foster collaboration and promote advances in an industry critical to global sustainable development. We extend a cordial invitation to actively participate and contribute to the success of this edition of the congress. We look forward to your proposals and your presence at this event of international relevance.

To do this, we call for the submission of abstracts in accordance with the following specifications:

- Work title
- Author (presenter) and Co-authors (if applicable). Full name and email.
- Organization(s) presenting the work
- Background, objectives, methodology and relevant results (150-200 words)
- Select up to 10 keywords related to the presentation
- Business photography in good resolution (white or gray background preferably)
- Identify the type of article (case study, review, new product, new research, other)
- The use of "Arial" font, black and size 12 is recommended. It is not necessary for the summary to include images or graphics.

Important dates:

- Abstract submission: March 7, 2023. Send the abstract to the email: x.ortiz@penspen.com
- Review of works: March 7, 2023 to March 15, 2024
- Sending presentations in PDF format: March 20, 2024.

Send presentation to email: x.ortiz@penspen.com

The Organizing Committee proposes, but is not limited to, the following topics of the congress, which may be addressed from technological, economic, political, social and environmental, or interdisciplinary perspectives:

- Design, Construction and Material Selection
- Repair and Rehabilitation Technologies
- Duct Life Extension
- Integrity and Risk Management
